The Fort Myers Beach Mosquito Control District is recovering from Hurricane Ian as many of you in our District but there has been no interruption in our dedicated service to the Beach. We have the staff, products and equipment to continue to control the mosquito population. Certain trouble areas have been identified as a result of the Hurricane such as delinquent pools, clogged stormwater basins and other water retaining locations. These have been mapped and receive surveillance and treatment as required.

Are mosquitoes becoming a problem in your area?

How to report and request service:

Website: www.fmbmc.org

Use the service request icon to enter your information.

Telephone: 239-247-1205

Give us a call and tell us all about it.

Email: fmbmctd@gmail.com

Shoot us an email and describe the situation and how to get a hold of you.

Fight the Bite

Property Owners can empty standing water sources and remove brush and lawn debris to reduce the opportunity for mosquitoes to propagate.
